NORTH BRIDGTON

Bridgton Academy

The preliminaries of the Brown prize speaking were completed last week in the chapel classes of the English classes and the selection of eight members was made to compete in the semi-finals, which will take place during the next week. Public speaking is a compulsory course at Bridgton Academy for the three upper classes and a special election teacher is in charge of the instruction of the students. Mrs. Edward Abbott of Bridgton has filled this position for the past seven years and she will start in preparing the speakers for the finals as soon as the selection is made next week. Fifty dollars is offered each year under the Brown prize at Bridgton Academy for the best speaker in the finals and competition in this worth while subject. The following selection for speakers for this year for the semi-finals has been made: Sarah Hersey of Waterford, Ruth Johnson of Harrison, Dorthea Ward of Harrison, Edward O'Connell of Dorchester, Mass., Everett Schindler of Waterford, Mass., and Mark Harkness of New London, Conn., and Walter Batchelder of Andover, Mass. Sophomore class, Christine Gardner of Waterford, Joyce Hill of Harrison, George Tinker of New London, Conn., and Edward Harkness of New London, Conn., and Walter Batchelder of Andover, Mass.

Clara Lupton, captain of the Bridgton Academy hockey team has returned to school from a two week stay at the Maine General Hospital, where he was taken after the Halloweek hockey game, when he was hit in the head from a puck shot from the blue line. In trying to stop the puck with his hands he lost sight of it and it struck him on the forehead, rendering him unconscious when he struck his head, and thus receiving a bad shaking as well as a severe head injury. He has now gone to his home at Malden, Mass., and probably will be out of school for some time.

Bridgton Academy is again tackling another hard schedule in football this fall. During the last season the team was one of the best in the history of the school and through the guidance of coach "Fish" Ellis, former Tufts star, she really ran off with the state championship. The team did not suffer defeat in any of its games and was victorious in the Boston College freshmen game and St. James High in a post-season game. The schedule is as follows:

Sept. 26, Boston College Freshmen at Bridgton.

Oct. 4, Lynn General Electric at Lynn.

Oct. 10, Bates Junior Varsity at Lewiston.

Oct. 14, University of Maine Freshmen at Brunswick.

DAIRY HERD IMPROVEMENT ASSOCIATION

What It Should Mean to a Farmer

I believe that as conditions are at present the farmers of Oxford County should keep only the best of cows. Good grades are all right, but pure bred are better. Most of our general farmers should keep cows to maintain the farm at best advantage. I think the best milk should be on the farm and the cream sold. I believe that the farmer should improve his cows for production and to do this he should carry out the four following facts:

1. Use good bulls.

2. Be regular in feeding and care of cows.

3. Take good care of the heifer calves.

4. To prove that the farmer should join a Herd Improvement Association to find out just what his cows are and what they can do for him, I will relate a true story of a herd I have in mind. In 1921 the owner of this herd of seven cows joined a cow test association. The first year records showed the following facts: That the highest cow produced 6102 pounds of milk testing 3.91 per cent. with 2412 pounds butterfat. The lowest cow produced 2493 pounds milk, testing 3.8 per cent. with 913 pounds butterfat. The average of the herd for the year was 4057.2 pounds milk, test 4.1 per cent. and 197.2 pounds butterfat. The result was that three of the seven cows were sold for beef at the end of the first year test work, because figures showed the feed costs for the low producing cows were as high as for the high producing ones. This should make it very clear that cow test work is very important to find out just what you have for cows and what each cow is doing for you in the herd.

In 1922 a purebred bull was bought and three remaining cows were bred to this bull, all heifer calves being raised and a pure bred bull has been used since. The cows have been tested yearly and records kept. Now just a word to production for the year 1929. The first heifer from the first bull produced in 1929: 10,555 pounds milk testing 3.63 per cent. with 271.33 pounds butterfat. The second produced: 10,723 pounds milk testing 3.56 per cent. with 331.73 pounds butterfat. The first six heifers from the first bull averaged 555.5 pounds milk, average test 3.82 per cent. with an average of 326.5 pounds butterfat. These figures should show that cow test records would be a good investment for any farmer.

The present herd of this farmer consists of twenty-two cows and heifers, all from two purebred bulls kept since 1922. The six cows being milked in January, 1929 produced 18,508 pounds milk, 208.3 pounds butterfat with an average test 3.9 per cent., which shows still clearer that this herd is still improving.

In addition to keeping records and using a good bull, the heifer calves should be taken care of, for a stunted calf means a stunted cow. The farmer should be very regular in feeding his cows as well as milking. The milk should be weighed daily and the cows fed according to the amount of milk they give. "In closing my motto would be, 'Good cows, well fed, and properly cared for would mean better profits'."—P. S. Mason, Jr., South Paris, Maine, Dairy Herd Improvement Association member.

A CALL AT THE COURT HOUSE

A recent call at the court house to prove a will found all the court judges and the Superior Court had been in session a week, while the Probate Court was for only a day. It however had a large amount of business on its docket.

What a change a quarter of a century, when the writer was clerk of the courts, had brought about. In place of the Supreme Court, was the new Superior Court, created for the trial of causes, "between party and party". Not one of these trial judges is known to me.

In place of Judge Addison E. Herick of Bethel, his able and worthy successor, He is liked so well by the members of the bar and others who do business in his court, that he will stay in office as long as he chooses to.

The Register of Probate, Albert D. Park, is the only one besides myself, of the county officers now alive who moved down from the Hill with us into the new court house at South Paris, nearly thirty-five years ago. He is apparently a fixture there now. It seemed mighty good to see one of my old associates still at his post of duty.

In place of my close and lamented friend, J. Hastings Bean, Register of Deeds, was Harvey E. Powers, a worthy successor. Mr. Bean, who is liked by everybody and is entitled to a re-election this year, will undoubtedly get it.

Harry Stinson, as High Sheriff and jailer, is "making good" in fact a very able and conscientious officer and deserves a re-election and will "land the job" beyond a doubt. This is stated by the "book" as paid him by the State to "go up and enquire". This is particularly true for Uncle Horace's information.

The writer met two of his old friends, Ned Hastings of Fryburg and business in the Superior Court. Ned and "Perk" were always favorite practitioners before the judges in the old days. Long may they live to faithfully serve their clients.

The County Commissioners were in session. It is a good board of officials. The writer on another occasion has expressed his opinion of its chairman, who he might succeed himself. My old friend, Willis Waite of Dixfield, a very able man—according to usage, in 1931-2 will be chairman of the board.

It will be of interest to the many friends of that very capable little woman, Mrs. Annie W. Sessions, to learn that she was appointed administrator of the estate of her father—the late Alfred W. Whitehouse. Besides the education she acquired, she had a good business training for a number of years in the Norway National Bank.

The finest thing about the courthouse is the splendid painting on the wall of the court room, back of the judge's desk, representing the institution of law in the time of the Emperors of Rome. There is nothing like it anywhere in Maine. The artist, H. H. Cochran of Monmouth, may well be proud of his production.

We had a fine minute call on Mrs. Ada Morton Bolster after leaving the court house. She has had hospital treatment, but is now recovering. Mr. Bolster is a cousin of the writer's wife—four mothers being sisters. She is one of the first ladies of South Paris.

Her husband, N. Dayton Bolster, was one of the leading and prominent citizens of his village and town. He passed away several years ago, lamented by all who knew him, after having built up a good business. His son, Morton, a very exemplary young man, is filling his place with Mr. Hanson in the store. The store is a charming daughter, Ruth, who has a fine education with business experience as clerk in the Savings Bank, is caring for her mother during her recovery.

Mr. N. Dayton Bolster was one of the best of men to work with in any enterprise or business as the writer knows by experience. He might have been one of the country commissioners, state senator or Governor's councilor, had he cared for political honors.—C. F. Whitman.

Oxford County United Parish

Embracing Albany, North Lovell, Stoneham and the Waterford parishes. Pastoral Staff: Revs. W. L. Bull, B. F. Wentworth, A. C. Townsend

The annual winter carnival was successfully held last Saturday at North Waterford. The usual large number of people from the parish and near by towns were present to share in or to witness the contests. Only a few of the events are here mentioned.

At the ski jump, the best jump was made by Stanley Lord, 28 feet without falling. Cummings of South Paris, jumped 21 feet, 7 1/2 inches, but fell in landing, as did most of the others. In the girls' intermediate cross country ski race, Barbara Fillebrown of Waterford took first; Mabel Hersey of North Waterford, second; Eunice Morse of North Waterford, third. In the high school cross country ski race, South Paris took first and third; Norway, second and fourth.

In the high school snow-shoe dash, South Paris, first and second; Norway, third. In the high school relay race, snow-shoes, South Paris, first; Norway, second. Boys' intermediate snow-shoe dash, Norway, first; South Paris, second; North Waterford, third. Boys' cross country relay race, John Fox, first; Alvin Hersey, second; Lewis Decker, third.

Of the parishes in the Grange Hall, the boys' senior snow-shoe dash, Chesley took first; North Waterford, second; John Fox were tied for second place. A second run-off, Hersey took second, Fox third. There were obstacle races, with one ski and one snow-shoe. The team from North Waterford won the relay race, and a rope pull for everybody.

Supper was served, as the dinner, in the Grange Hall. In the evening the Fellowship Hall was filled to hear the announcements of winners, the awarding of prizes, the crowning of the Carnival Queen, and to witness the drama, "Take My Advice", by North Waterford.

This was declared to be one of the most successful dramas given since the Parish was organized. Great credit is due to Mr. Wentworth for the success of the day and evening as he has been handicapped by the absence of Mr. Bull. The drama is to be repeated at South Waterford, with a supper, on Thursday evening of this week, and at North Lovell on Saturday evening, also with a supper.

The Carnival Queen for the year is Miss Elsie Merrill of East Stoneham. The King's cup was won by John Fox of North Waterford; the Sunday school cup by Mary Hersey of North Waterford; and the high school cup by South Paris high school team.

Don't neglect a COLD

DISTRESSING cold in chest or throat—that so often leads to something serious—generally responds to good old Musterole with the first application. Should be more effective if used **once every hour for five hours.**

Working like the trained hands of a masseur, this famous blend of oil of mustard, camphor, menthol and other helpful ingredients brings relief naturally. It penetrates and stimulates blood circulation, helps to draw out infection and pain. Used by millions for 20 years. Recommended by doctors and nurses. Keep Musterole handy—jars and tubes.

To Mothers—Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

THREE IMPORTANT FACTORS ENTER INTO THE COST OF Your Automobile

1. How much it costs to make the car
2. How much extra you pay the dealer
3. How much it costs for operation and up-keep

THE PURCHASE of an automobile involves a considerable amount of money and it should be carefully considered from all angles before a final decision is made.

The value of the car to you depends on the value built into it at the factory, how much extra you pay the dealer for distribution, selling, financing and accessories and what it will cost to operate and maintain the car after purchase. Each of these factors, as it relates to the Ford car, is frankly explained below.

Economy in production

THE FORD CAR is made economically because of the efficiency of Ford production methods. The money saved through this efficiency is put back into the car in improved quality of material and in greater care and accuracy in manufacturing. The constant effort is to eliminate waste and find ways to make each part better and better without increasing cost—frequently at lowered cost.

Because of Ford economies in large production and because the Ford organization operates on a low-profit margin, the price you pay for the car is much less than it would be under any other conditions. Yet it brings you many unusual features of construction and performance.

At least \$75 extra value is represented alone by the Triplex shatter-proof glass windshield, the Rustless Steel, the four Houdaille double-acting hydraulic shock absorbers, and the five steel-spoke wheels. The unusually large number of ball and

roller bearings and the extensive use of fine steel forgings instead of castings or stampings are additional features that reflect the high quality built into every part of the car. Throughout, it is a value far above the price you pay.

Low dealer charges

THE SAME PRINCIPLES of efficiency and economy that characterize the manufacture of the Ford car are applied also to distribution. Obviously it would do the public little good to save in production if these savings were sacrificed later in excessive costs of selling, financing and accessories.

The Ford dealer, therefore, operates on the same low-profit margin as the Ford Motor Company, his discount or commission being the lowest of any automobile dealer. He does a good business because he makes a small profit on many sales instead of a large profit on fewer sales.

NOTE THESE LOW PRICES

Roadster . . .	\$435
Phaeton . . .	\$440
Coupe . . .	\$500
Two-window Fordor Sedan . . .	\$600
Three-window Fordor Sedan . . .	\$625
Cabriolet . . .	\$645
Town Sedan . . .	\$670

(All prices f. o. b. Detroit)

Low charges for time payments through the Universal Credit Company

The lower cost of selling, combined with the low charges for financing and accessories, means a direct saving of at least \$50 to \$75 to every purchaser of a Ford, in addition to the savings made possible by economies in manufacturing. The money you pay for a Ford goes into value in the car. It is not wasted in high dealer charges.

Low up-keep costs

IT IS IMPORTANT to remember that the cost of your automobile is not the first cost only, but the total cost after months and years of service. Here again there is a decided saving when you buy a Ford.

The cost of operation and up-keep is lower because of simplicity of design, the high quality of material, and the reduction of friction and wear through unusual accuracy in manufacturing and assembling. The reliability and longer life of the car contribute to its low depreciation per year of use.

The intelligent, painstaking service rendered by Ford dealers is under close factory supervision and is a factor in the low up-keep cost of the Ford. All labor is billed at a flat rate and replacement parts are always available at low prices through Ford dealers in every section of the United States.

In two, three or five years, depending on how much you drive, the saving in operating and maintaining a new Ford will amount to even more than the saving on the first cost of the car.

WHOSE MONEY IS IT?

A newspaper headline said, "War of Oratory Waged by Senators Against Opp of State Speculation." All of which reminds us of the saying credited to Mark Twain to the effect that "we talk a lot about the weather but no one seems to do anything about it."

American citizens have an inborn desire for adventure. The majority of them are not satisfied to settle into dull routine and merely exist year after year without experiencing pleasures and contentment as well as sorrows and regrets which inevitably accompany speculative excursions into any line of endeavor. After government has provided laws and regulations to protect investors against fraud, it has done its part.

We are not a nation of babies who have to be told what we can buy and what we cannot buy. The day laborer who has saved \$100 and thinks he sees an opportunity to invest it with profit, has as good a right to exercise his judgment as the wealthiest man in the land. Moralize or orate as you will on this subject—the American people will not take kindly to any paternalistic policy which attempts to tell them where, now or where they may spend their money.

THE GOOD OLD STATE OF MAINE

They talk about the southern states, They talk about the sunny south, Where they never have the snow. They talk about the western states, Where they raise most all the grain, But they will not in the north, In the good old State of Maine.

The lakes and streams are full of fish, And the woods are full of game, They have no use for the hedgehog, But they have it, just the same. There's where they enjoy God's sunshine, There's where they enjoy the rain, And they have wonderful midnight nights, In the good old State of Maine.

I have traveled through the wild wood, Spending many happy hours, Watching the birds in their freedom, And the bees among the flowers. There's where the birds sing the loudest, In Springtime, their sweet refrain, There's where the roses bloom the brightest, In the good old State of Maine.

The laws of God we must obey, And also the laws of man, We were taught as we were young, And we will do the best we can, If the laws of nature we obey, Then some laws of man we rain, For we could not obey them all, In the good old State of Maine.

I am proud of my native state, Of its mountains and its plains, Of the lakes and flowing rivers, In the grand old State of Maine. Yes, I may go to other states, But I will return again, There's where I wish to live and die, In the good old State of Maine. —E. K. O.

SUMNER—LABRADOR POND

The snow has settled rapidly since the recent rain, followed by the warm, sunny days, and on Sunday a large flock of crows were seen flying over, all of which reminds us that spring is not so very far away and the spring season right upon us.

Thelma Andrews celebrated her ninth birthday on February 23rd, by entertaining several of her girl friends, namely, Ruth and Virginia Gammon, Irma Stetson, Thelma Myers, also her aunt, Mabel Dyer, and cousin, Thomas Dyer. She was presented with several nice little gifts from the girls, also received several cards. A birthday cake and strawberry mousse were served to the party, after which all went out of doors to enjoy the winter sports. Irma remained for the night and all seemed to have a very enjoyable afternoon.

Lawrence Andrews and William Sellinger were at their homes over the week end.

Della Andrews and daughter, Thelma Edith, spent the afternoon recently with Mrs. Walter Sellinger.

Julian Dyer is working in the woods at Hartford Center, for George Brown.

George Spaulding is in the neighborhood with his wood sawing outfit, saving up our wood piles for us.

Thomas Dyer was a caller, Sunday, at Walter Newell's.

Leland Andrews has recently built a very handy "kitchen cabinet" in the kitchen of his home, also is to make several other improvements about the place this coming spring.

George Turner is doing chores for Linwood Morse.

Mrs. Mordant Rowe entertained the following at dinner, Sunday: Mr. and Mrs. Rupert Boland, Mr. and Mrs. Arthur Alvington, and their three children; Mr. and Mrs. Milton Warren and two children of East Buckfield, Silver Rowe of Sumner, Mr. and Mrs. Leo Bessy of this place and Kenneth Grant of Buckfield, and there were four of her own family.

MAINE WEATHER

The weather stuff in Maine is mixed. With most exciting care, So well-proportioned it has proved The finest anywhere. Storm or sunshine, stars or darkness, Summer breeze, or winter snow, Fairish weather always fits As seasons come and go. Travelers confirm the blessings of the weather here in Maine. No matter what the weather is, Some people will complain; But every Son of Sense enjoys The weather here in Maine. God makes the weather and He gives To Maine the best He makes. With which, no other can compete, For He makes no mistakes. —REV. WM. WOOD, Bath.
